In Nepal we now have 3 projects regarding children who are underprivileged. The projects consist of not only their educational needs but the physical needs regarding their clothing and hygiene.

1. In the district of Gorkha we have 12 handicapped children whom we help support yearly with uniforms, clothing and toys. We also made them beds, provided mattresses and built shelves for their books as well as supplied them Braille Bibles and Braille typewriters. This year they got their teeth checked and their eyes for the first time by medical doctors from Taiwan in which some have the possibility to see by having an operation.

2 In the district of Makwanpur we have an additional 23 children who receive uniforms and books each year. This year we did a Christmas Blanket drive in which we were able to provide well over 150 blankets to needy children there in the cold winter months! (pics coming soon!) This was more than double of the amount we were able to supply in 2012.

3 In Kathmandu we built a fence in the front and back of the St. Joseph's school thus adding security as well as making it a general safe area for the children to play. We also were able to build a ping pong table, bathroom and classroom doors, donate 10 computers, and books and a set of Britannica encyclopedias along with a cabinet for the school. In 2015 we will be upgrading the school desks and tables as well as plastering and cementing the school to make it look better and safer conditions for the children.

4. In Nepal we saw God work and 7 people received healings in which 4 of them were instantaneous! Wow! More healings followed both in Taiwan and China.

5. 110 kilos (266 lbs.) of donated items, such as Christian books, a complete set of Encyclopedia Britannica, clothing, sports equipment, and school materials, were brought to Nepal in March with no overweight charges (donated free by the airlines I flew on) and again another 34 kilos consisting of computer equipment and Bibles for the Blind in August.
